I urge you to reject petition 04-160.

The National Association of Broadcasters wishes on one hand to loosen regulations when doing so benefits, citing that competition is critical to broadcasting's survival.

However, when the very seeds they have sown do not produce the fruit desired (more competition, but not to the benefits of their members), they wish the Commission to once again change the rules to benefit the NAB.

XM local news, weather and road conditions are an essential public safety service, and are desired by we, the listeners of XM radio.

Again, please reject the NAB petition.
